

## Township Leaf Collection Program: Important Information for Residents

As autumn blankets our township with vibrant foliage, it's time to remind residents about the reinstated leaf collection program. This initiative not only helps maintain the beauty of our neighborhoods but is crucial for keeping stormwater inlets clear. Collected leaves are transported to local facilities, where they are recycled into nutrient-rich compost, benefiting our community and environment.

### Benefits of Leaf Collection

The leaf collection program offers several advantages:

- **Environmental Impact:** Recycling leaves into compost reduces landfill waste and provides valuable organic material for gardens and landscaping.
- **Stormwater Management:** Keeping stormwater inlets clear prevents flooding and ensures proper drainage.

### Using Your Lawn Mower

For those with composting lawn mowers, consider leaving the shredded leaves in place instead of piling them for collection. This method enriches your lawn and reduces the need for additional yard waste collection.

### Collection Schedule and Guidelines

The leaf collection schedule is weather and time-dependent, and while we strive to stay on track, delays may occur. Here are key points to remember:

- **Collection Timing:** Leaves must be placed by the roadway by **7:00 AM on the first day of your scheduled collection week**. Please be prepared for collection any day during that week.
- **Two Pickups per Zone:** Due to the high volume of leaves collected, each street will receive **two pickups**. Please ensure your leaves are ready on time, as the truck will only return for one additional pickup
- **Street Accessibility:** The township does not collect leaves from private or undedicated streets. Make sure your pile is as close to the road as possible, within reach of our vacuum equipment.

### Preparation Tips

To ensure a smooth collection process, follow these guidelines:

- **Do Not Combine Materials:** Piles should consist solely of **leaves**. Mixing in sticks, grass clippings, or other yard waste can clog the equipment and cause delays.
- **Keep Vehicles Clear:** Please refrain from parking on or near leaf piles, allowing ample room for collection equipment.

### After Collection

If you still have leaves after your scheduled pickup or reside on a State Road, you are always able to drop off any yard waste at Britton Industries, 4108 Bethlehem Pike, Telford, PA (1<sup>st</sup> & 2<sup>nd</sup> Saturday of every month) or contact your private trash hauler for alternative collection options.

By participating in the leaf collection program, you help contribute to a cleaner and greener community. Thank you for your cooperation and commitment to maintaining our township's beauty!

Please contact Budd Hutchinson with any questions: 215-453-6000, 230.

**Zone 1 October 28, 2024 – November 15, 2024**
